Trademarks

The following trademarks are used in this document:

- Microsoft is a registered trademark of Microsoft Corp.
- Windows 8, 10 and Explorer are trademarks of Microsoft Corp.
- Apple and Mac OS are registered trademarks of Apple Inc.
- Other products may be trademarks or registered trademarks of their respective manufacturers.

Safety Instructions and Approval

Safety Instructions

- Read the installation guide thoroughly before you set up the router.
- The router is a complicated electronic unit that may be repaired only be authorized and qualified personnel. Do not try to open or repair the router yourself.
- Do not place the router in a damp or humid place, e.g. a bathroom.
- Do not stack the routers.
- The router should be used in a sheltered area, within a temperature range of +5 to +40 Celsius.
- Do not expose the router to direct sunlight or other heat sources. The housing and electronic components may be damaged by direct sunlight or heat sources.
- Do not deploy the cable for LAN connection outdoor to prevent electronic shock hazards.
- Keep the package out of reach of children.
- When you want to dispose of the router, please follow local regulations on conservation of the environment.

Warranty

We warrant to the original end user (purchaser) that the router will be free from any defects in workmanship or materials for a period of two (2) years from the date of purchase from the dealer. Please keep your purchase receipt in a safe place as it serves as proof of date of purchase. During the warranty period, and upon proof of purchase, should the product have indications of failure due to faulty workmanship and/or materials, we will, at our discretion, repair or replace the defective products or components, without charge for either parts or labor, to whatever extent we deem necessary tore-store the product to proper operating condition. Any replacement will consist of a new or re-manufactured functionally equivalent product of equal value, and will be offered solely at our discretion. This warranty will not apply if the product is modified, misused, tampered with, damaged by an act of God, or subjected to abnormal working conditions. The warranty does not cover the bundled or licensed software of other vendors. Defects which do not significantly affect the usability of the product will not be covered by the warranty. We reserve the right to revise the manual and online documentation and to make changes from time to time in the contents hereof without obligation to notify any person of such revision or changes.

Declaration of Conformity

Hereby, DrayTek Corporation declares that the radio equipment type Vigor2865 is in compliance with Directive 2014/53/EU.

The full text of the EU Declaration of Conformity is available at the following internet address:

https://www.draytek.com.tw/ftp/Vigor2865/Document/CE/

Manufacturer: DrayTek Corp.

Address: No. 26, Fushing Rd., Hukou, Hsinchu Industrial Park, Hsinchu 303, Taiwan

Product: Vigor2865 Series

Frequency Information for Europe area:

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device may accept any interference received, including interference that may cause undesired operation.

USA Local Representative	Company name	ABP International	l Inc.		
	Address	13988 Diplomat Drive Suite 180 Dallas TX 75234

Caution:

Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the equipment.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Radiation Exposure Statement: This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

The antenna/transmitter should be kept at least 20 cm away from human body.

1. Package Content

Take a look at the package content. If there is anything missed or damaged, please contact DrayTek or dealer immediately. Besides, the content is subject to the real package.

The type of the power adapter depends on the country that the router will be installed. * The maximum power consumption is *28 Watts*.

2. Panel Explanation

2.1 Vigor2865L

LED		Status	Explanation
ACT		Off	The router is powered off.
		Blinking	The router is powered on and running
			normally.
WAN2		On	Internet connection is ready.
		Off	Internet connection is not ready.
		Blinking	The data is transmitting.
QoS		On	The QoS function is active.
		Off	The QoS function is inactive.
LTE		On	LTE device is connected and ready for use.
		Off	LTE device is not detected, or has serious
			problem (e.g., no SIM card, SIM pin error, SIM
			deactivated, and etc.).
		Blinking	Slowly: LTE device is in dialing up.
			Quickly: The data is transmitting.
DSL		On	The router is ready to access Internet through
			DSL link.
		Blinking	Slowly: The DSL connection is ready.
			Quickly: The connection is training.
WCF		On	The Web Content Filter is active. (It is enabled
		0.55	from Firewall >> General Setup).
		Off	WCF is disabled.
USB		On	USB device is connected and ready for use.
		Off	No USB device is connected.
		Blinking	The data is transmitting.
VPN		On	The VPN tunnel is active.
		Off	VPN services are disabled
		Blinking	Traffic is passing through VPN tunnel.
DMZ		On	The DMZ function is enabled.
		Off	The DMZ function is disabled.
		Blinking	The data is transmitting.
LED on Connector			
	Left	On	The port is connected.
WAN2	LED	Off	The port is disconnected.
/ P6		Blinking	The data is transmitting.

	Right	On	The port is connected with 1000Mbps.
	LED	Off	The port is connected with 10/100Mbps.
	Left	On	The port is connected.
LAN P1~P5	LED	Off	The port is disconnected.
P1~P5		Blinking	The data is transmitting.
	Right	On	The port is connected with 1000Mbps.
	LED	Off	The port is connected with 10/100Mbps.

The port "WAN2 / P6" is switchable. It can be used for LAN connection or WAN connection according to the settings configured in WUI.

Interface	Description
Factory Reset	Restore the default settings. Usage: Turn on the router (ACT LED is blinking). Press the hole and keep for more than 5 seconds. When you see the ACT LED begins to blink rapidly than usual, release the button. Then the router will restart with the factory default configuration.
USB	Connecter for a USB device (for 3G/4G USB Modem or printer or thermometer).
WAN2 / P6	Connecter for local network devices or modem for accessing Internet.
LAN P1-P5	Connecters for local network devices.
DSL	Connecter for accessing the Internet.
PWR	Connecter for a power adapter.
ON/OFF	Power Switch.
LTE	Connecter for installing LTE antennas.
SIM 2/ SIM 1	Slots for installing SIM card.

2.2 Vigor2865ac / Vigor2865Lac / Vigor2865ax

LED	Status	Explanation
ACT	Off	The router is powered off.
	Blinking	The router is powered on and running
		normally.
WAN2	On	Internet connection is ready.
	Off	Internet connection is not ready.
	Blinking	The data is transmitting.
QoS	On	The QoS function is active.
	Off	The QoS function is inactive.
USB	On	USB device is connected and ready for use.
	Off	No USB device is connected.
	Blinking	The data is transmitting.
LTE	On	LTE device is connected and ready for use.
	Off	LTE device is not detected, or has serious
		problem (e.g., no SIM card, SIM pin error, SIM
		deactivated, and etc.).
	Blinking	Slowly: LTE device is in dialing up.
		Quickly: The data is transmitting.
DSL	On	The router is ready to access Internet through
		DSL link.
	Blinking	Slowly: The DSL connection is ready.
		Quickly: The connection is training.
WCF	On	The Web Content Filter is active. (It is
	0.55	enabled from Firewall >> General Setup).
0.10/50	Off	WCF is disabled.
2.4G/5G	On	2.4G/5G: Wireless access point with
		bandwidth of 2.4GHz/5GHz is ready.

		WLAN: Wireless access point is ready.
	Off	Wireless function is disabled.
	Blinking	It will blink slowly while wireless traffic goes through.
		ACT and WLAN LEDs blink quickly and simultaneously when WPS is working, and will return to normal condition after two minutes. (You need to setup WPS within 2 minutes.)
	On	The DMZ function is enabled.
	Off	The DMZ function is disabled.
	Blinking	The data is transmitting.
LED on Connector		
Left	On	The port is connected.
LED	Off	The port is disconnected.
	Blinking	The data is transmitting.
Right	On	The port is connected with 1000Mbps.
LED	Off	The port is connected with 10/100Mbps.
Left	On	The port is connected.
LED	Off	The port is disconnected.
	Blinking	The data is transmitting.
Right	On	The port is connected with 1000Mbps.
LED	Off	The port is connected with 10/100Mbps
	Left LED Right LED Left LED	On Off Blinking Connector Left On LED Off Blinking Right On LED Off Left On LED Off Blinking Right On

The port "WAN2 / P6" is switchable. It can be used for LAN connection or WAN connection according to the settings configured in WUI.

Interface	Description
Wireless LAN ON/OFF/WPS	Wireless band will be switched /changed according to the button pressed and released. For example,
	• 2.4G (On) and 5G (On) - in default.
	 2.4G (Off) and 5G (On) - pressed and released the button once.
	 2.4G (On) and 5G (Off) - pressed and released the button twice.
	 2.4G (Off) and 5G (Off) - pressed and released the button three times.
	When WPS function is enabled by web user interface, press this button for more than 2 seconds to wait for client's device making network connection through WPS.
Factory Reset	Restore the default settings. Usage: Turn on the router (ACT LED is blinking). Press the hole and keep for more than 5 seconds. When you see the ACT LED begins to blink rapidly than usual, release the button. Then the router will restart with the factory default configuration.
USB1~2 / USB	Connecter for a USB device (for 3G/4G USB Modem or printer or thermometer).
WAN2 / P6	Connecter for local network devices or modem for accessing Internet.

LAN P1-P5	Connecters for local network devices.		
DSL	Connecter for accessing the Internet.		
WLAN	Connecter for installing WLAN antennas. (For ac/ax model).		
PWR	Connecter for a power adapter.		
ON/OFF	Power Switch.		
LTE	Connecter for installing LTE antennas. (For L model).		
SIM 2/ SIM 1 Slot for installing SIM card. (For L model).

The port "WAN2 / P6" is switchable. It can be used for LAN connection or WAN connection according to the settings configured in WUI.

Interface	Description
Wireless LAN ON/OFF/WPS	Wireless band will be switched /changed according to the button pressed and released. For example,
	• 2.4G (On) and 5G (On) - in default.
	• 2.4G (Off) and 5G (On) - pressed and released the button once.
	 2.4G (On) and 5G (Off) - pressed and released the button twice.
	 2.4G (Off) and 5G (Off) - pressed and released the button three times.
	When WPS function is enabled by web user interface, press this button for more than 2 seconds to wait for client's device making network connection through WPS.
Factory Reset	Restore the default settings. Usage: Turn on the router (ACT LED is blinking). Press the hole and keep for more than 5 seconds. When you see the ACT LED begins to blink rapidly than usual, release the button. Then the router will restart with the factory default configuration.
USB1~2	Connecter for a USB device (for 3G/4G USB Modem or printer or thermometer).
WAN2 / P6	Connecter for local network devices or modem for accessing Internet.
LAN P1-P5	Connecters for local network devices.
Phone 1/2	Connecter for analog phone(s).
DSL	Connecter for accessing the Internet.
WLAN	Connecter for installing WLAN antennas.
PWR	Connecter for a power adapter.
ON/OFF	Power Switch.
·	

3. Hardware Installation

This section will guide you to install the router through hardware connection and configure the router's settings through web browser.

Before starting to configure the router, you have to connect your devices correctly. (For the hardware connection, we take "ac" model as an example.)

3.1 Network Connection

- Connect the DSL interface to the land line jack with a DSL line cable, <u>or</u>
 Connect the cable Modem/DSL Modem/Media Converter to the WAN port of router with Ethernet cable (RJ-45).
- 2. Connect one end of an Ethernet cable (RJ-45) to one of the LAN ports of the router and the other end of the cable (RJ-45) into the Ethernet port on your computer.
- 3. Connect one end of the power adapter to the router's power port on the rear panel, and the other side into a wall outlet.
- 4. Power on the device by pressing down the power switch on the rear panel.
- 5. The system starts to initiate. After completing the system test, the ACT LED will light up and start blinking. (For the detailed information of LED status, please refer to section 2. Panel Explanation)

3.2 Wall-Mounted Installation

Vigor router has keyhole type mounting slots on the underside.

- 1. Drill two holes on the wall. The distance between the holes shall be 168mm.
- 2. Fit screws into the wall using the appropriate type of wall plug.

3. When you finished about procedure, the router has been mounted on the wall firmly.

3.3 Antenna Installation (for "L" model)

Magnetic antenna must be installed on the extension base before connecting to Vigor router.

There are two mounting holes for installing antennas with extension base on Vigor router. Please install them as shown below.

Note, if only one antenna shall be installed, please use the mounting hole (major signal transmitted hole) near to the power switch.

While installing the SIM card into the card slot, note that back plate of the SIM card slot must be removed first and the direction of card notch must be on the left side.

There are two types of antennas provided for Vigor2865Lac, which must be installed in different locations carefully and correctly. Wrong installation might cause bad signal of wireless connection. Therefore, pay attention to the installation of antennas by referring to the following illustration.

4. Software Configuration

To access Internet, please finish basic configuration after completing the hardware installation.

4.1 Quick Start Wizard for Network Connection

The **Quick Start Wizard** is designed for you to easily set up your router for Internet access. You can directly access the **Quick Start Wizard** via Web Configurator. Make sure your PC connects to the router correctly.

Note

You may either simply set up your computer to get IP dynamically from the router or set up the IP address of the computer to be the same subnet as the default IP address of Vigor router 192.168.1.1. For the detailed information, please refer to - Trouble Shooting of the user's guide.

Open a web browser on your PC and type http://192.168.1.1. A pop-up window will open to ask for username and password. Please type "admin/admin" as the Username/Password and click Login.

Note

If you fail to access to the web configuration, please go to "Trouble Shooting" on User's Guide for detecting and solving your problem.

Now, the Main Screen will pop up. Click Wizards>>Quick Start Wizard.

Note

The home page will change slightly in accordance with the router you have. Here we take Vigor2865Lac as an example.

If your router can be under an environment with high speed NAT, the configuration provide here can help you to deploy and use the router quickly. The first screen of **Quick Start Wizard** is entering login password. After typing the password, please click **Next**.

Enter login password Please enter an alpha-numeric string as your Password (Max 83 characters) Old Password New Password Confirm Password Password Strength: Strong password requirements: 1. Have at least one upper-case letter and one lower-case letter. 2. Including non-alphanumeric characters is a plus. Hint: If you want to keep the password unchanged, leave the password blank and press "Next" button to skip this process.

On the next page as shown below, please select the WAN interface that you use. If DSL interface is used, please choose WAN1; if Ethernet interface is used, please choose WAN2; if wireless 2.4G/5G connection is used, please choose WAN3 or WAN4; if 3G USB modem is used, please choose WAN5 or WAN6. Then click Next for next step. Each WAN interface will bring up specific configuration page. Here, we take WAN1 as an example.

Interface	
WAN Interface:	WAN1 V
Display Name:	
Physical Mode:	ADSL/VDSL2
DSL Mode:	Auto
Physical Type:	Auto negotiation 🗸
VLAN Tag insertion(ADSL):	Disable 🕶
VLAN Tag insertion(VDSL2):	Disable 🕶

Click **Next** to go to the following page. You have to select the appropriate Internet access type **according to the information from your ISP**. For example, you should select PPPoE mode if the ISP provides you PPPoE interface. In addition, the field of **For ADSL Only** will be available only when ADSL is detected. Then click **Next** for next step.

PPPoE/PPPoA

1. Choose WAN1 as WAN Interface and click the Next button; you will get the following page.

2. After finished the above settings, simply click Next.

3. Please manually enter the Username/Password provided by your ISP. Then click **Next** for viewing summary of such connection.

- 4. Click Finish. A page of Quick Start Wizard Setup OK!!! will appear. Then, the system status of this protocol will be shown.
- 5. Now, you can enjoy surfing on the Internet.

MPoA / Static or Dynamic IP

1. Choose **WAN1** as WAN Interface and click the **Next** button; you will get the following page.

WAN 1	
Protocol	MPoA / Static or Dynamic IP 🗸
For ADSL Only:	
Encapsulation	1483 Bridged IP LLC
VPI	0 Auto detect
VCI	38
Fixed IP	○ Yes ● No(Dynamic IP)
IP Address	
Subnet Mask	
Default Gateway	
Primary DNS	8.8.8.8
Second DNS	8.8.4.4

2. Please type in the IP address/mask/gateway information originally provided by your ISP. Then click **Next** for viewing summary of such connection.

- 3. Click Finish. A page of Quick Start Wizard Setup OK!!! will appear. Then, the system status of this protocol will be shown.
- 4. Now, you can enjoy surfing on the Internet.

5. Customer Service

If the router cannot work correctly after trying many efforts, please contact your dealer for further help right away. For any questions, please feel free to send e-mail to support@draytek.com.

Be a Registered Owner

Web registration is preferred. You can register your Vigor router via https://myvigor.draytek.com.

Firmware & Tools Updates

Due to the continuous evolution of DrayTek technology, all routers will be regularly upgraded. Please consult the DrayTek web site for more information on newest firmware, tools and documents.
